

ABSTRACT

The present invention provides a urea derivative or a salt thereof, which is useful as a therapeutic agent for thrombosis. The derivative is represented by Formula (I):

5 [Chemical formula I]

wherein Cy is an aromatic hydrocarbon group which may be substituted or an aromatic heterocyclic group which may be substituted; R¹ is a hydrogen atom or a hydrocarbon group which may be substituted; V is -C(O)-, -S(O)-, or -S(O)₂-; 10 W is -N(R²)-, -O-, or a bond (wherein R² is a hydrogen atom or a hydrocarbon group which may be substituted); X is alkylene which may be substituted; Y is -C(O)-, -S(O)-, or -S(O)₂-; Z is a bond, a chain hydrocarbon group which may be substituted, or -N=; ring A is a non-aromatic nitrogen-containing heterocyclic ring which may be substituted; ring 15 B is a nitrogen-containing heterocyclic ring which may be substituted; and

[Chemical formula 2]

-----, -----

are each independently a single bond or a double bond; 20 provided that R¹ may be bonded to R² to form a non-aromatic nitrogen-containing heterocyclic ring and that R² may be bonded to a substituent of X to form a non-aromatic

nitrogen-containing heterocyclic ring which may be substituted.
